

A Brief History: Workshop on the Statistical Analysis of Multi-outcome Data (SAM)

History

1. Originated in 2010, discussing with John O'Quigley
2. Focus areas: joint model of multiple outcomes, recurrent events, multivariate longitudinal data
3. Only invited sessions
4. No parallel session – you have no choice!!!
5. Held in even years: 2012, 2014, 2016

First Workshop

1. Curie Institute (*Institut Curie*) in Paris, France
2. Two day workshop July 9-10, 2012
3. Twenty four invited speakers (8 sessions)
4. Around 100 participants

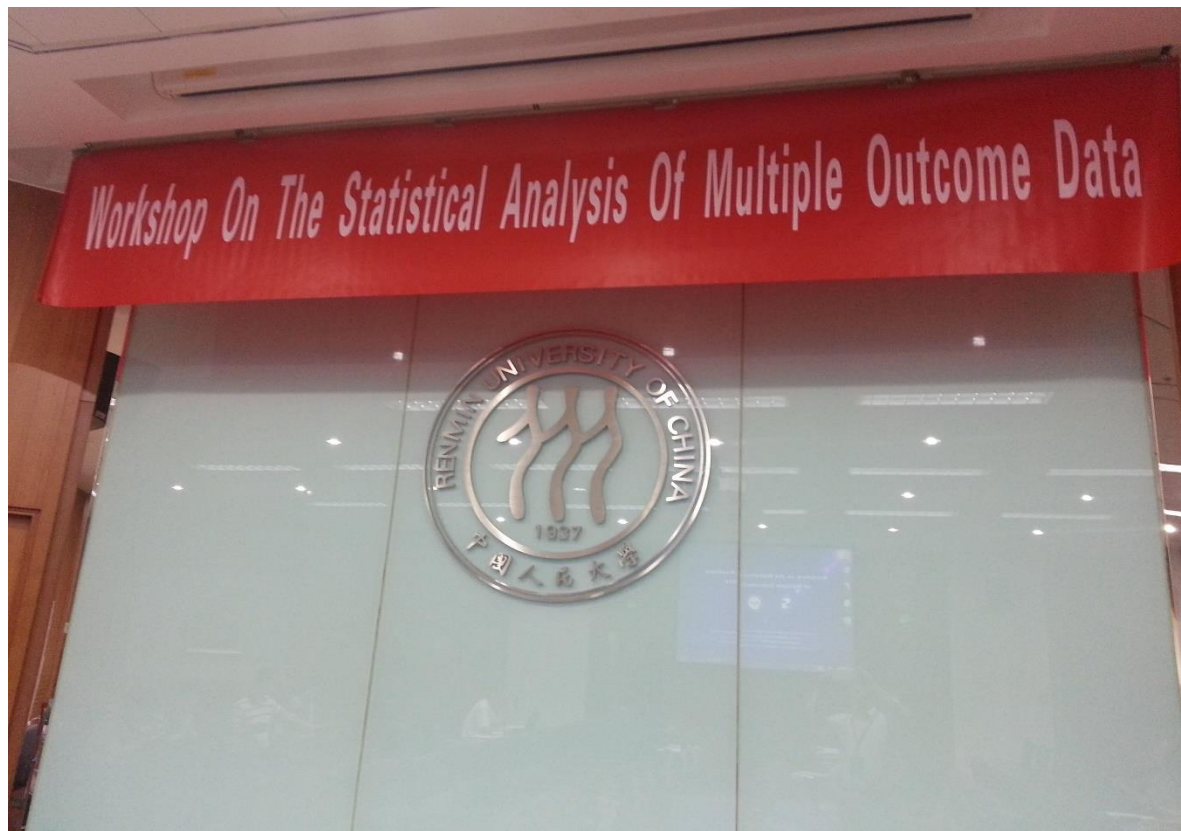

Second Workshop

1. In the University of Cambridge, UK
2. Two day workshop June 30-July 1, 2014
3. Twenty four invited speakers (8 sessions)
4. Website:
<http://www.phpc.cam.ac.uk/events3/statistical-analysis-of-multi-outcome-data-workshop/>

Third Workshop

1. Renmin (People's) University of China, Beijing
2. Two day workshop July 4-5, 2016
3. Add sessions on topics, e.g., high dimensional multi-outcome data

Fourth Workshop

1. Washington University in St. Louis
2. Two day workshop June 10-11, 2018
3. Add a poster session for graduate students and poster award for 5 students.

Acknowledgements

1. John O'Quigley and Phillip Saint Pierre
2. Jessica Barrett and Michael Sweeting
3. Yang Li and Feifang Hu
4. DC Rao, Philip Miller, and Chengjie Xiong
